

MAKI Search Filter Reference

All filters work in **maki search**, the web UI search box, and saved searches. Filters combine with **AND**. Free-text tokens search names, filenames, descriptions, and metadata.

Filter	Syntax	Example
Asset type	<code>type:<type></code>	<code>type:image, type:video</code>
Tag	<code>tag:<name></code>	<code>tag:landscape, tag:"Fools Theater"</code>
Tag whole path	<code>tag:=<name></code>	<code>tag:=Legoland</code> (exact value, not leaves elsewhere)
Tag leaf only	<code>tag:/<name></code>	<code>tag:/animal bird</code> (no descendants)
Tag case-sensitive	<code>tag:~<name></code>	<code>tag:~Landscape</code> (not "landscape")
Tag prefix anchor	<code>tag: <text></code>	<code>tag: wed</code> (wedding, wedding-2024, ...)
Exclude tag	<code>-tag:<name></code>	<code>-tag:rejected</code>
Format	<code>format:<ext></code>	<code>format:nef, format:jpg</code>
Rating	<code>rating:<N>, <N>+, <N>-<M>, <N>,<M></code>	<code>rating:4+, rating:3-5, rating:0</code> (un-rated)
Color label	<code>label:<color>, label:none</code>	<code>label:Red, label:none</code>
Camera	<code>camera:<text></code>	<code>camera:fuji, camera:"Canon EOS R5"</code>
Lens	<code>lens:<text></code>	<code>lens:56mm, lens:"RF 50mm"</code>
Description	<code>description:<text>, desc:<text></code>	<code>description:sunset</code>
ISO	<code>iso:<N>, iso:<min>-<max></code>	<code>iso:100, iso:100-800</code>
Focal length	<code>focal:<N>, focal:<min>-<max></code>	<code>focal:50, focal:35-70</code>
Aperture	<code>f:<N>, f:<min>-<max></code>	<code>f:2.8, f:1.4-2.8</code>
Width / Height	<code>width:<N>+, height:<N>+</code>	<code>width:4000+, height:2000+</code>
Source metadata	<code>meta:<key>=<value></code>	<code>meta:software=CaptureOne</code>
Path pattern	<code>path:<pattern> (*=wild)</code>	<code>path:*/2026/*/party</code>
Collection	<code>collection:<name></code>	<code>collection:Favorites</code>
Date	<code>date:<prefix></code>	<code>date:2026, date:2026-02</code>
Date from / until	<code>dateFrom:<date>, dateUntil:<date></code>	<code>dateFrom:2026-01-01</code>
Volume	<code>volume:<label></code>	<code>volume:Archive, volume:none</code>
Asset ID	<code>id:<prefix></code>	<code>id:72a0bb4b</code>
Copies	<code>copies:<N>, copies:<N>+</code>	<code>copies:1, copies:2+</code>
Variants	<code>variants:<N>+</code>	<code>variants:2+</code>
Tag count (leaves)	<code>tagcount:<N>, tagcount:<N>+, tagcount:<A>-</code>	<code>tagcount:0, tagcount:5+</code>
Scattered	<code>scattered:<N>+, scattered:<N>+/<depth></code>	<code>scattered:2+/1</code>
Duration (seconds)	<code>duration:<N>, duration:<N>+, duration:<min>-<max></code>	<code>duration:60, duration:30+</code>
Codec	<code>codec:<text></code>	<code>codec:h264, codec:hevc</code>
GPS location	<code>geo:<S>,<W>,<N>,<E></code>	<code>geo:47.5,11.0,48.5,13.0</code>
GPS any/none	<code>geo:any, geo:none</code>	<code>geo:any</code>
Orphan	<code>orphan:true</code>	<code>orphan:true</code>
Missing files	<code>missing:true</code>	<code>missing:true</code>
Stale verification	<code>stale:<days></code>	<code>stale:30</code>
Stacked	<code>stacked:true, stacked:false</code>	<code>stacked:true</code>
Face count [Pro]	<code>faces:any, faces:none, faces:<N>+</code>	<code>faces:2+</code>
Person [Pro]	<code>person:<name></code>	<code>person:Alice</code> (repeat for AND, comma for OR)
Visual similarity [Pro]	<code>similar:<id>, similar:<id>:<limit></code>	<code>similar:72a0bb4b:50</code>
Similarity threshold [Pro]	<code>min_sim:<percent></code>	<code>min_sim:90</code>
Text search [Pro]	<code>text:<query></code>	<code>text:"sunset beach"</code>
Embedding status [Pro]	<code>embed:any, embed:none</code>	<code>embed:none type:image</code>

All numeric filters support: exact (3), minimum (3+), range (3-5), OR (2,4).

MAKI Search Filter Reference

Combining Filters

AND Repeat a filter to require all values
tag:landscape tag:sunset

OR Comma within a single filter
tag:alice,bob format:nef,cr3

NOT Dash prefix excludes matches
-tag:rejected -format:xmp

Combined type:image,video -tag:rejected
rating:3+

Hierarchical tags: tag:bird matches at any level —
animal|bird, animal|bird|eagle, and standalone bird.

Sort Options

date_desc Newest first (*default*)

date_asc Oldest first

name_asc Name A→Z

name_desc Name Z→A

size_desc Largest first

size_asc Smallest first

similarity_desc Most similar first [\[Pro\]](#)

similarity_asc Least similar first [\[Pro\]](#)

Usage: maki search "rating:4+" --sort name_asc

Output Formats

(*default*) ID, filename, type, format, date

--format ids / -q One UUID per line (scripting)

--format full Default + tags, description

--format json JSON array

--format '{..}' Custom template

Placeholders: {id}, {name}, {filename}, {type},
{format}, {tags}, {description}, {rating}, {label},
{date}, {size}

Path Normalization

The path: filter auto-normalizes in the CLI:

~ Expands to home directory

./ ../ Resolves relative to cwd

/Volumes/... Strips volume mount, applies volume:

Common Recipes

rating:4+ type:image

Best images

date:2026-03 tag:landscape

March landscapes

format:nef -tag:processed

Unprocessed RAWs

copies:1 volume:Photos

Single-copy files (backup candidates)

stale:90

Not verified in 90 days

orphan:true

Assets with no file locations

faces:any person:Alice rating:4+

Alice's best shots

similar:72a0bb4b rating:3+ min_sim:80 [\[Pro\]](#)

Visually similar, curated

text:"sunset on the beach" min_sim:70 [\[Pro\]](#)

Semantic image search
